Size:	20"	24"	30"	35"
Width:	20"	24"	30"	35"
Width:	20"	24"	30"	35"
Thickness:	3"	3"	3"	5-1/2"
Approx. Weight:	80 Lbs.	110 Lbs.	175 Lbs.	275 Lbs.

Installation: Pier Caps are most commonly installed on the tops of fence pillars, walls pillars, and are used for mailbox caps.

Sealing: Sealing is not required on Rocky Mountain Stone Products. But, if you would like to seal your stone, use only a quality masonry sealer that is of "Penetrating Breathable" type that is either a Silane or Siloxane based product. As with any sealer, the color of the stone may change after an application. Be sure to test the sealer on several different inconspicuous places on the stone, to determine if the color change is acceptable.
